

Role Profile

Senior Developer

Exeter or UK based remote options available
£35,000 - £45,000 depending on experience

About the Role

As a Senior Developer, you play a critical role within your Agile team and the wider organisation, designing, developing, communicating and evangelising our software development methods, functionality development and technology exploitation.

You will be part of a new, highly skilled team, driving change not just in our organisation, but across the field service management industry as a whole. In order to join us during this exciting time you will need to facilitate the delivery of exceptional software by:

- Working as part of an Agile team delivering new solutions, using leading technologies
- Working closely with Product Owners and stakeholders to deliver their vision
- Undertaking software development activities
- Delivering the product vision through the use of leading technologies
- Iteratively delivering solutions and refining them based upon feedback from stakeholders

About You

We are an innovative, energetic Company and look for employees who demonstrate these values. We look for individuals who are creative, confident and have a happy and positive outlook in their personal and professional lives, you will have a growth mindset and are comfortable with the uncomfortable!

In addition to this and to succeed in the role of Senior Developer, you need to demonstrate the following skills and competencies:

- Excellent communicator with the ability to converse outside of the development area without technical jargon blurring the message
- Strong team player with the ability to work closely with other technologists toward shared goals
- Excellent written and verbal communication skills
- Skilled at working effectively with cross functional teams in a matrix organisation
- Analytical mind and problem-solving aptitude

About your Experience - Skills and Competencies

To succeed in the role of Senior Developer you will have:

- 3+ years of experience as a full-stack developer in a commercial web development environment
- Open to working in Scrum/Kanban/other well known Agile frameworks
- Strong Java 7+ (Spring) knowledge
- In-depth understanding of the entire development process (design, development and deployment)
- Experience working with Jenkins or similar CI platforms
- Good working knowledge of Git and version control
- Experience with SQL
- Good knowledge of RESTful APIs

About Us
